We would like to thank you for signing up for our session. We are looking forward to presenting this powerful presentation at AU 2011. As we are preparing the final touches, we want to extend an invitation to you to continue the discussion at our Unconference session. This time will allow us the opportunity to go deeper in this topic and to hear from users like yourself on how you are using the System approach to architecture today.

See you in Vegas!
Mike and Rabi

**Discussion Topics**

- Discuss how classification systems will affect the future of BIM
- Describe how classification systems are being used today
- List the benefits of using classification systems in Revit
- Explain how classification systems are affecting your design
